

BL-905

PRODUCT TECHNICAL DATA SHEET

USAGE

Murakami BL-905 Blockout is a medium viscosity, water soluble blue blockout. BL-905 is designed to fill the open areas of the screen that are not covered by emulsion or film. BL-905 can be used for masking out other designs on a screen until they are printed. BL-905 is excellent for touching up pin holes and fish eyes.

ADVANTAGES:

- Low VOC, non-hazardous, biodegradable, and drain safe
- Fast drying and covers with one coat
- Completely water soluble
- Low odor

APPLICATION:

Step 1:

The screen must be dry and free of contaminants. Spread BL-905 evenly with a plastic squeegee on the print side of the screen over the areas to be filled. Remove excess BL-905 from the squeegee side.

Step 2:

Touch up all defects, including heavy blobs that tend to gather outside of the filled area. Allow BL-905 to completely dry.

**** ALWAYS READ THE MSDS SHEET ****

IMPORTANT: Technical data herein is believed to be accurate. It is offered for your consideration, investigation, and verification. Buyer assumes all risk of use, storage, and handling of the product. No warranty, express or implied is made, including but not limited to, implied warranties of merchantability and fitness for a particular purpose. Nothing contained herein shall be considered as a license to operate under, or recommendation to infringe any patents.
