

Murakami Capillary Film

- Capillary film provides consistent emulsion thicknesses for consistent printing.
- Print side RZ values are smoother than emulsion creating superior ink control.
- Capillary film can be applied with water for indirect screens, or emulsion for direct/indirect.
- Custom cut sheet sizes expedite production and achieve predictable EOM.

Capillary Film

Murakami Thick Film:

- Prints high density inks, gels, and viscous pastes easily.
- Smooth vertical side walls release ink for sharp prints.
- Thick film density resists compression during the print stroke maintaining EOM for consistent prints.
- Adhere thick film with One Pot Sol C Emulsion.
